Professional Summary

A strategic and customer-focused Software Engineer with over 5 years of experience in developing applications that streamline operations, reduce manual effort, and support key business objectives. Proven ability to lead within cross-functional teams by defining project estimations, mentoring on code standards, and maintaining a focus on delivering high-quality products. Skilled in IFS integrations, development, and configurations, with extensive experience in Agile methodologies.

Professional Experience

IFS Developer & Technical Consultant

Trinity Mechanical Services LLC
2026 Feb – Present

- Analyzed customer requirements and developed reports (Sales Quotation, Customer Order), including enhancements to existing IFS reports.
- Developed and delivered CRIMs and IFS Workflows tailored to customer requirements.

IFS Developer & Technical Consultant | Novacura Flow Developer | Software Engineer

Novacura AB
2022 Oct – 2026 Jan

- Developed IFS Cloud applications through CRIMs (Configurations, Reports, Integrations, Modifications), translating customer requirements into optimized technical solutions for 3 clients.
- Successfully delivered an IFS application version upgrade from 21R1 to 25R1, resolving customized code conflicts and ensuring a seamless transition completed within 3 months.
- Developed and deployed a customized IFS Supply Chain solution using OData integrations within Novacura Flow Studio, fully automating a manual workflow and reducing processing time by one-third.
- Built a centralized project management portal in Novacura by integrating IFS project functionalities, reducing managerial workload by approximately 50% through streamlined processes.

Software Engineer Intern

Elzian Agro & Kangaroo Cabs
2021 Mar – 2022 Sep

- Designed and implemented a multi-provider Social Media Login (Google, Facebook, LinkedIn), reducing barriers to entry and improving the overall user experience.
- Architected and built a secure user registration and login module for a new mobile application from the ground up, ensuring compliance with code standards and successful QA approval.
- Developed new backend features for a business web application using Node.js (Express.js) and MongoDB, contributing to ongoing application modernization.
- Actively participated in Agile retrospectives and stakeholder demos, communicating development progress and proposing data-driven ideas for future enhancements.

Education

BSc in Information Technology
Sri Lanka Institute of Information
Technology (SLIIT)

Certificates

- IFS Certified Practitioner - Integrations Developer (IFS Cloud)
- IFS Certified Practitioner - IFS Cloud Web Developer
- IFS Certified Practitioner - Technical Consultant (IFS Cloud)

Strengths
