PROFESSIONAL SUMMARY

A strategic, customer-focused Software Engineer with over 5 years of experience developing applications that streamline operations, reduce manual effort, and support key business objectives. Proven ability to lead within cross-functional teams by defining project estimations, mentoring on code standards, and maintaining a focus on delivering high-quality products. Skilled in IFS integrations, development, and configurations, with delivery experience spanning clients across Europe, the Middle East, and Asia.

PROFESSIONAL EXPERIENCE

IFS Developer & Technical Consultant

Feb 2026 – Present

Trinity Mechanical Services LLC · Dubai, UAE

- Lead report development across IFS, analysing customer requirements and building core business documents such as Sales Quotation and Customer Order reports, alongside enhancements to existing reports, using IFS Report Designer and IFS Report Studio.
- Partner with the client on configuration decisions, assessing whether a standard or alternative approach fits before committing to a new configuration, keeping the IFS environment lean and upgrade-friendly.
- Develop and deliver CRIMs (Configurations, Reports, Integrations, Modifications) and IFS Workflows tailored to customer requirements.
- Stay current with every new IFS release and actively engage with the IFS community, solving problems and continuously sharpening skills.

EDUCATION

BSc in Information Technology

Sri Lanka Institute of Information Technology (SLIIT)

Malabe, Sri Lanka · Graduated 2024

CERTIFICATIONS

IFS Certified Practitioner - Integrations Developer (IFS Cloud) ↗

IFS Certified Practitioner - IFS Cloud Web Developer ↗

SKILLS

IFS Ecosystem

IFS Cloud · IFS Applications 10 · Configurations · Reports · Report Designer · Report Studio · Integrations · Modifications · Business Process Automation (Workflows) · IFS Release & Service Upgrade (Update Analyser) · SCM & HCM modules

Novacura Flow

Flow Classic · Connect · Portal · Flow Studio · OData integrations

Programming

JavaScript (Node.js, Express.js) · Java

Databases

Oracle · MS SQL · MongoDB · PostgreSQL

IFS Developer & Technical Consultant & Novacura

Oct 2022 – Jan 2026

Flow Developer

Novacura AB (IFS Partner)

- Provided global support for 3 Nordic IFS Cloud clients across the Supply Chain and Manufacturing modules, delivering modifications, configurations, custom reports, and targeted integrations.
- Delivered a full IFS version upgrade from 21R1 to 25R1 within 3 months, analysing impacted customisations with IFS Update Analyser, upgrading modified code, and handling post-deployment rebasing to verify every customisation on the new release.
- Digitalised an IFS Applications 10 client's entire day-to-day supply chain operation (purchase requisitions, purchase orders, manual supplier invoices, and goods receiving) as task-focused apps on the Novacura Flow Classic low-code platform, cutting processing time by one-third.
- Extended the same solution with IFS Document Management, letting users view, download, upload, and delete IFS documents directly from their Flow apps.
- Built a centralised Project Management portal on Novacura Portal integrated with IFS OData services, consolidating project details, activities, and operations into one place and reducing managerial workload by ~50%.

Software Engineer Intern

Mar 2021 – Sep 2022

Elzian Agro & Kangaroo Cabs

- Designed and implemented a multi-provider social login (Google, Facebook, LinkedIn), reducing barriers to entry and improving the onboarding experience.
- Architected a secure user registration and login module for a new mobile application from the ground up, compliant with code standards and QA-approved.
- Developed backend features with Node.js (Express.js) and MongoDB for a live business web application, contributing to its modernisation.
- Contributed actively in Agile retrospectives and stakeholder demos, proposing data-driven enhancements.

Other

Agile Methodologies · Git

STRENGTHS

Consultative Solution Design

Checks whether standard functionality fits before building custom, keeping systems maintainable and upgrade-friendly.

End-to-End Delivery Ownership

Owns requirement analysis, estimation, development, and post-deployment verification.

User-Centric Product Thinking

Translates user feedback into actionable features that enhance satisfaction.

Data-Driven Decision Making

Uses data to inform strategy and improve product performance.

Mentoring & Knowledge Sharing

Mentors on code standards and shares IFS knowledge through technical writing.
